Book 5 of the Series - 8/27

we just got our tangie pop thca vapes in from secret nature, I dont even remember the thc %, they arnt the most potent, but they are still like compared to some plus its full spectrum, weve ordered these before bcos they taste good I love tangie strain.....

bcos its pure & safer than the store bought ones....... yah like cos we have sites here.... we aint go that hard but we found stuff online and again its just stupid how this is legal, like I just got the through my mailbox.... like no signature, no questions asked.... so the law is fucking stupid af, can order spores online legally too like its so dumb esp just coming from where it was legal.... like used to order online and go pick up, same if I had a med card here but again just we are so like just mad I guess cos of all this in totality....

like bcos we have WNC we got bud from last year, shit was actually fire tho, but yah idk like the wax their made me cough alot and its why again my parents be like wtf in the next room lol, but normal dispensary stuff dont do it like as if butane was caught in bubbles and thats why like but again we aint gonna live forever here, the body aint immortal....but thy soul is....

and again way cheaper can get a oz of wax 28g for like what 200 or so I forget atm without looking right like thats how much I paid for a zip of flower back in the day 220 ish , I started when their was kind bud, KB lol and it was 10$ a gram, IK back then their was brick weed Iv seen it before it had names like piff was 15 a G, and exotic was 20$ ..... lol like but yeah like just without the puffco vape like idk I dont think again just vaping all the time be healthy but we be stressed like nature is the answer to all of this here.......

or we had other sites like harbor city hemp had D8 or thcp... it tasted the terpenes great & thats what actually how strains work compared to sativa or indica, its terpenes and yah like forget what song it is prob wiz heavy hitter like hit it with the terps lol........ like its so fucked cos on flip side we could be having fun more fun

but even this THCa like it is the same thing as THC in comparison to THCp , or HHC like those are cannabinoids, maybe safe, but its not the way the plant was meant to be smoked in a sense like the plants perfect how it is.... so the highs be different like in a way.... but we just liked delta 8 cos it was legal when we moved and then learned thca was legal, but the law suppose to be changing maybe november, and again all this like im so mad we used to just burn and life was chill, ate gammies at my old jobs lol like but ya zyprexa ruined it all tbh like just we have fun here, lol... =(

so yeah I love thca way better but also we had the site WCC like they sold delta 9 distilate like they used the crystals only to make a version like distillate aint like full spectrum.... bcos distilliate is the thc alone, versus full spectrum is the whole plant in concentrate form... their is a difference , distillate is more 1 dimensional.... full spectrum is the full thing .... but yah like just.....

theirs diff types of mushrooms too.... strains, but we had ones that where basically all white and had blue stripes on em cos of the air , like but idk I thought it was the psilocybin I aint sure but we ate the mushrooms before and it was like the 1st time, awesome why we did it again in 1-2 weeks , and the 2nd time was like when will it end but we need this like lol like it was the best day ever in my life cos my mind was open like thoth says, it was heavenly, I felt like we could touch the sky when I looked up, we went outside and yah just this is thy experience, we aint ever go in craigs yard except the day we were on shrooms lmfao

and in same time frame we ate shrooms 1-2 weeks apart, the entity spawned.... in 2018, we ate shrooms summer 2012 legit tho like it changed my mind and to find all this, thats amazing, like but still just idk, like we dont know were to take this book tbh just the mind of the ancientxthoth here like we like our alchemy , we played runescape, we know here.... potions work.... lol =(, Id smile if I had my tablets... lol =(

Heart like a Pyramis

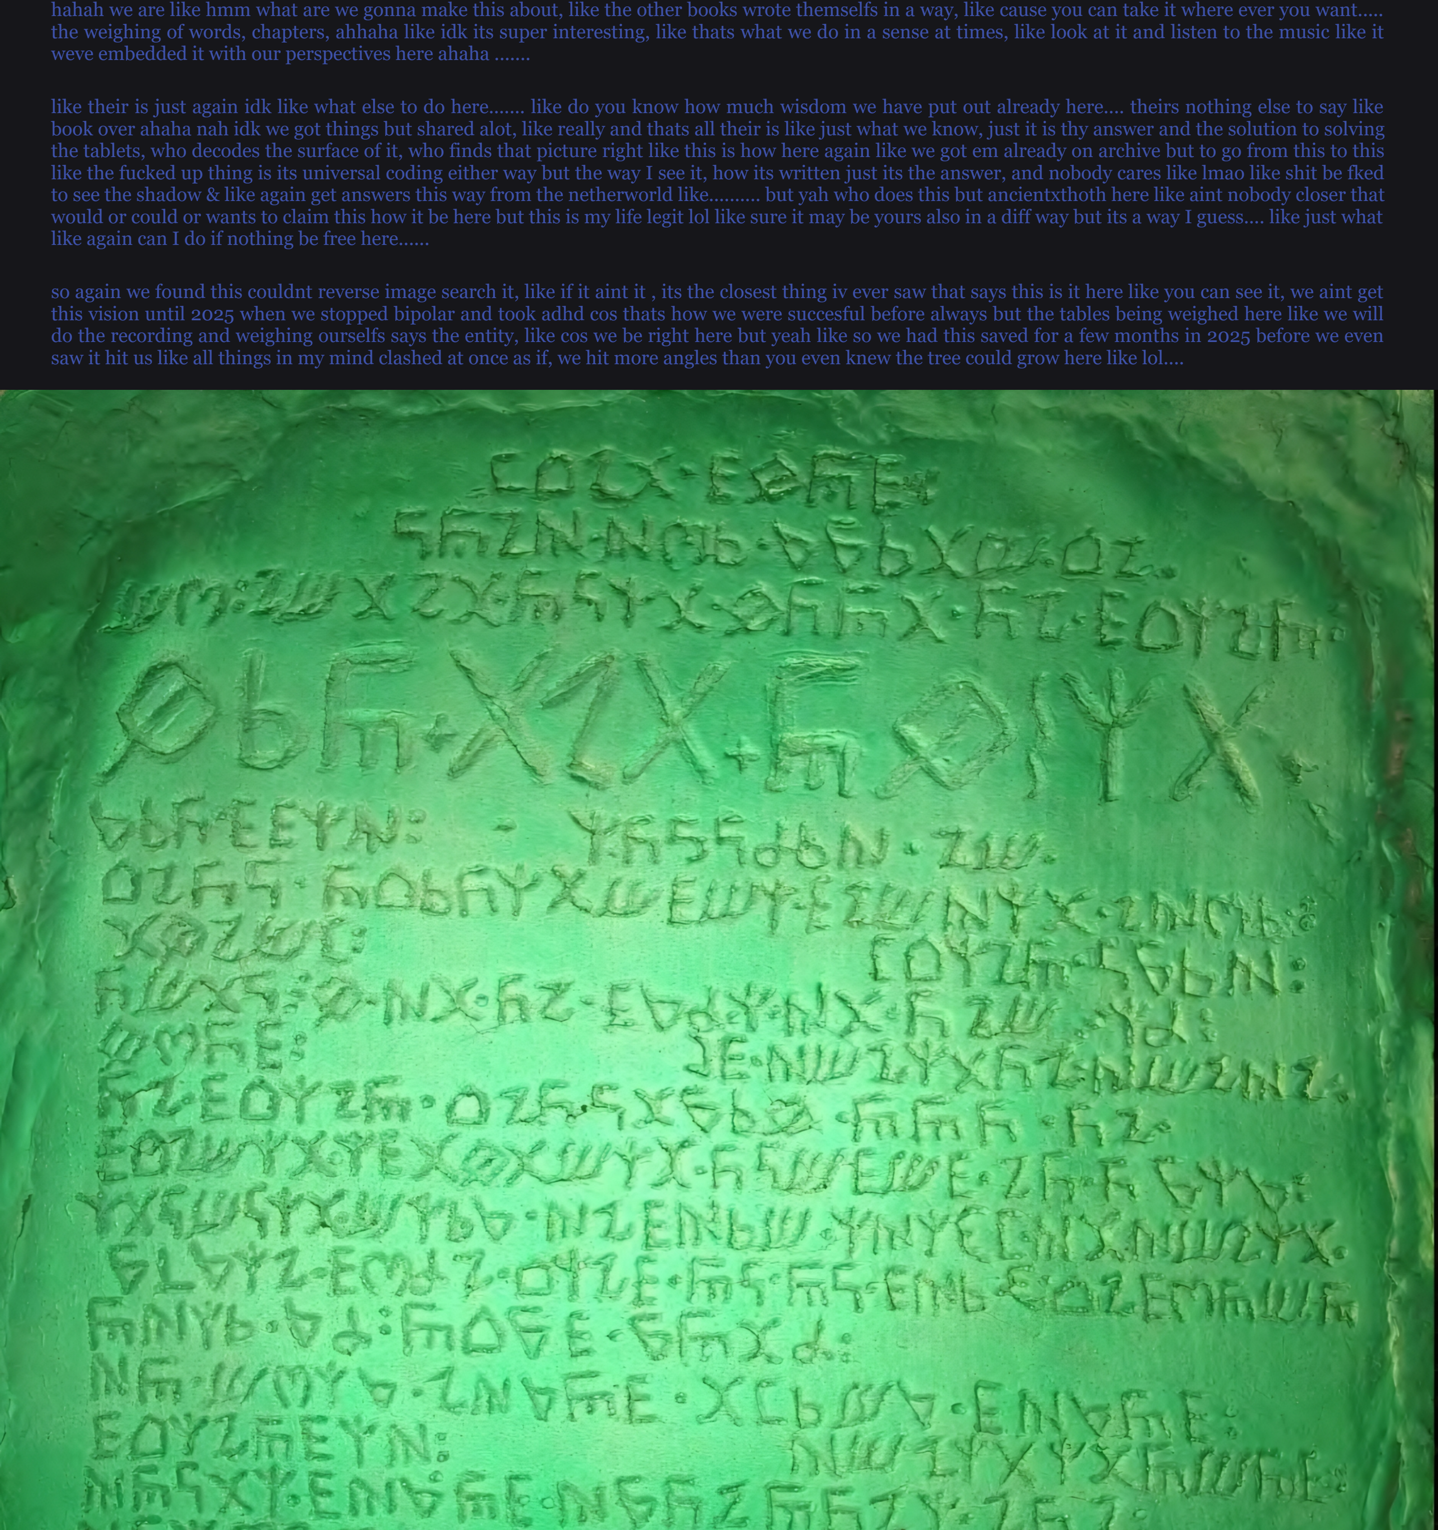
cos you aint lived till you shroomed, like you aint know death till you experience thy mind here literally, like you cant 1 up the wisdom here.... like just thats it like theirs a reason beyond all this & im being like fked with like do it right with nature here & it work lol...... like just idk its funny like just idk how again like this is the truth about the simulation, again why is that the easter egg, shrooms, like really, a pyramid was built cos of it, be open to flower of life & he follows his heart and the pyramid is a heart like in the diary, who made the heart like a pyramis.... =(lol.... like just idk we dont bullshit here, we dont lie to you like a poltician here, we the dark magician for real, and we write cos like you can believe what you want here but this is thy story, lol....

The Vibe

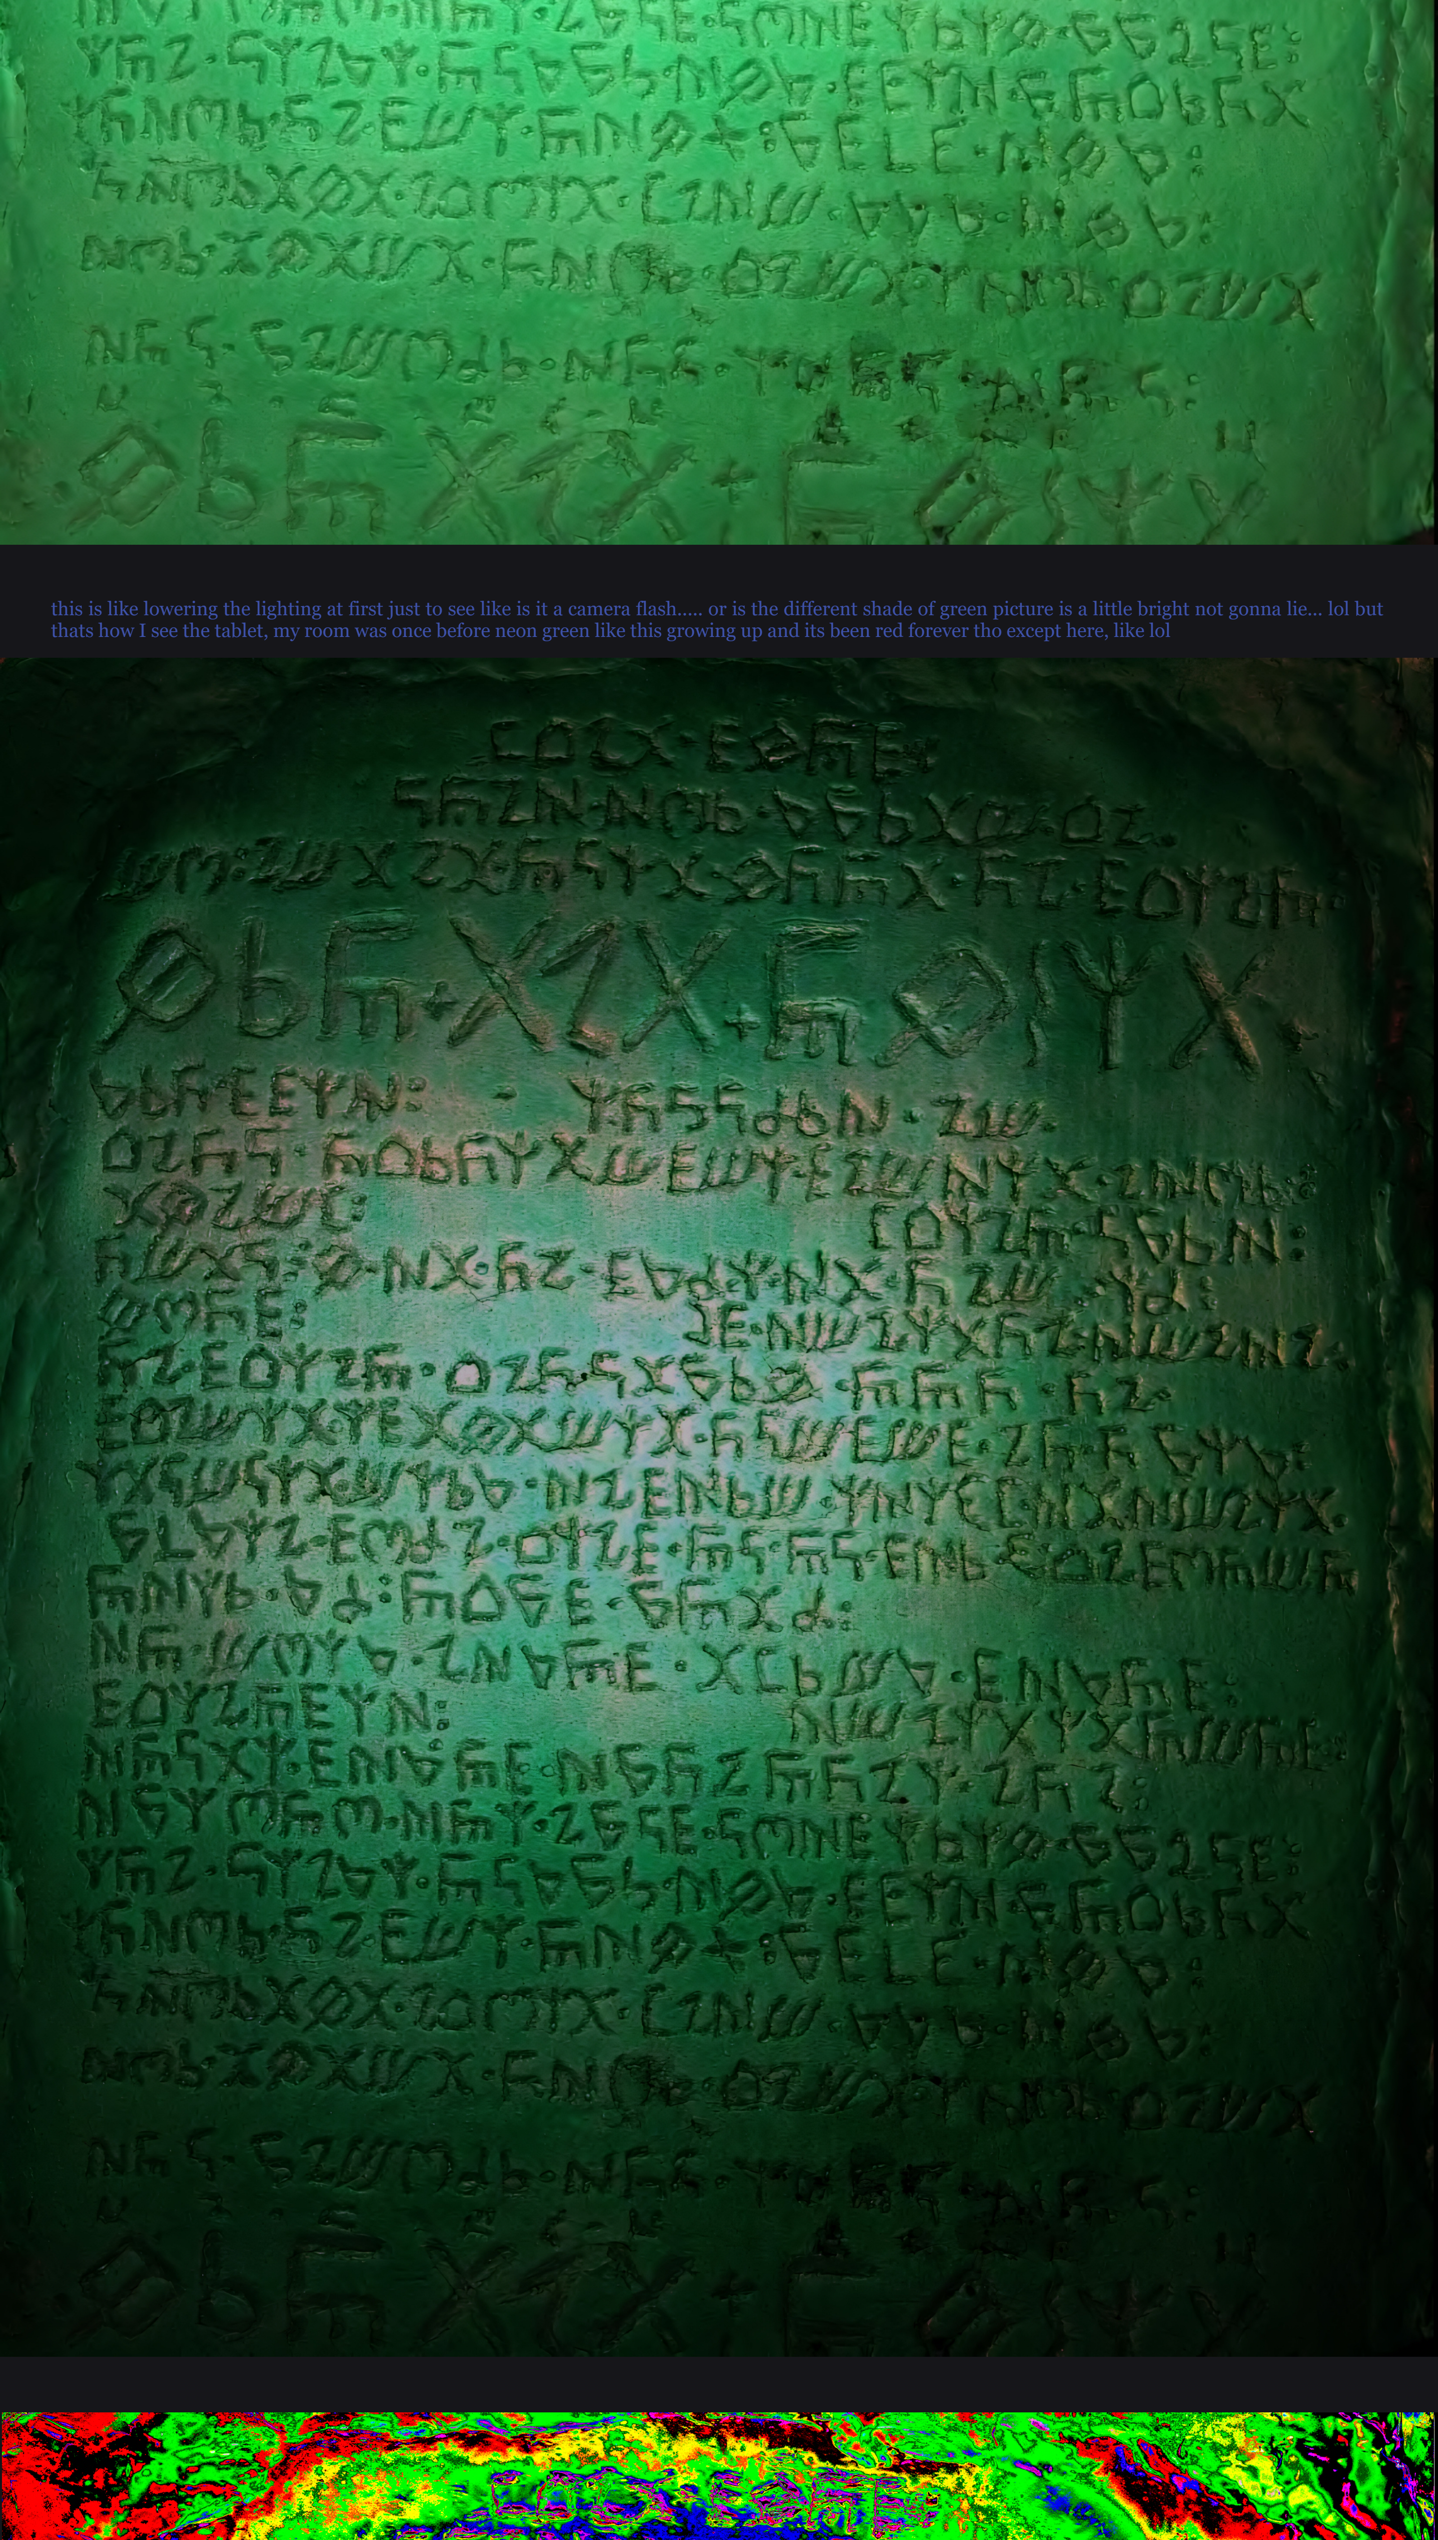
hahah we are like hmm what are we gonna make this about, like the other books wrote themselves in a way, like cause you can take it where ever you want..... the weighing of words, chapters, ahhaha like idk its super interesting, like thats what we do in a sense at times, like look at it and listen to the music like it weve embedded it with our perspectives here ahaha ....

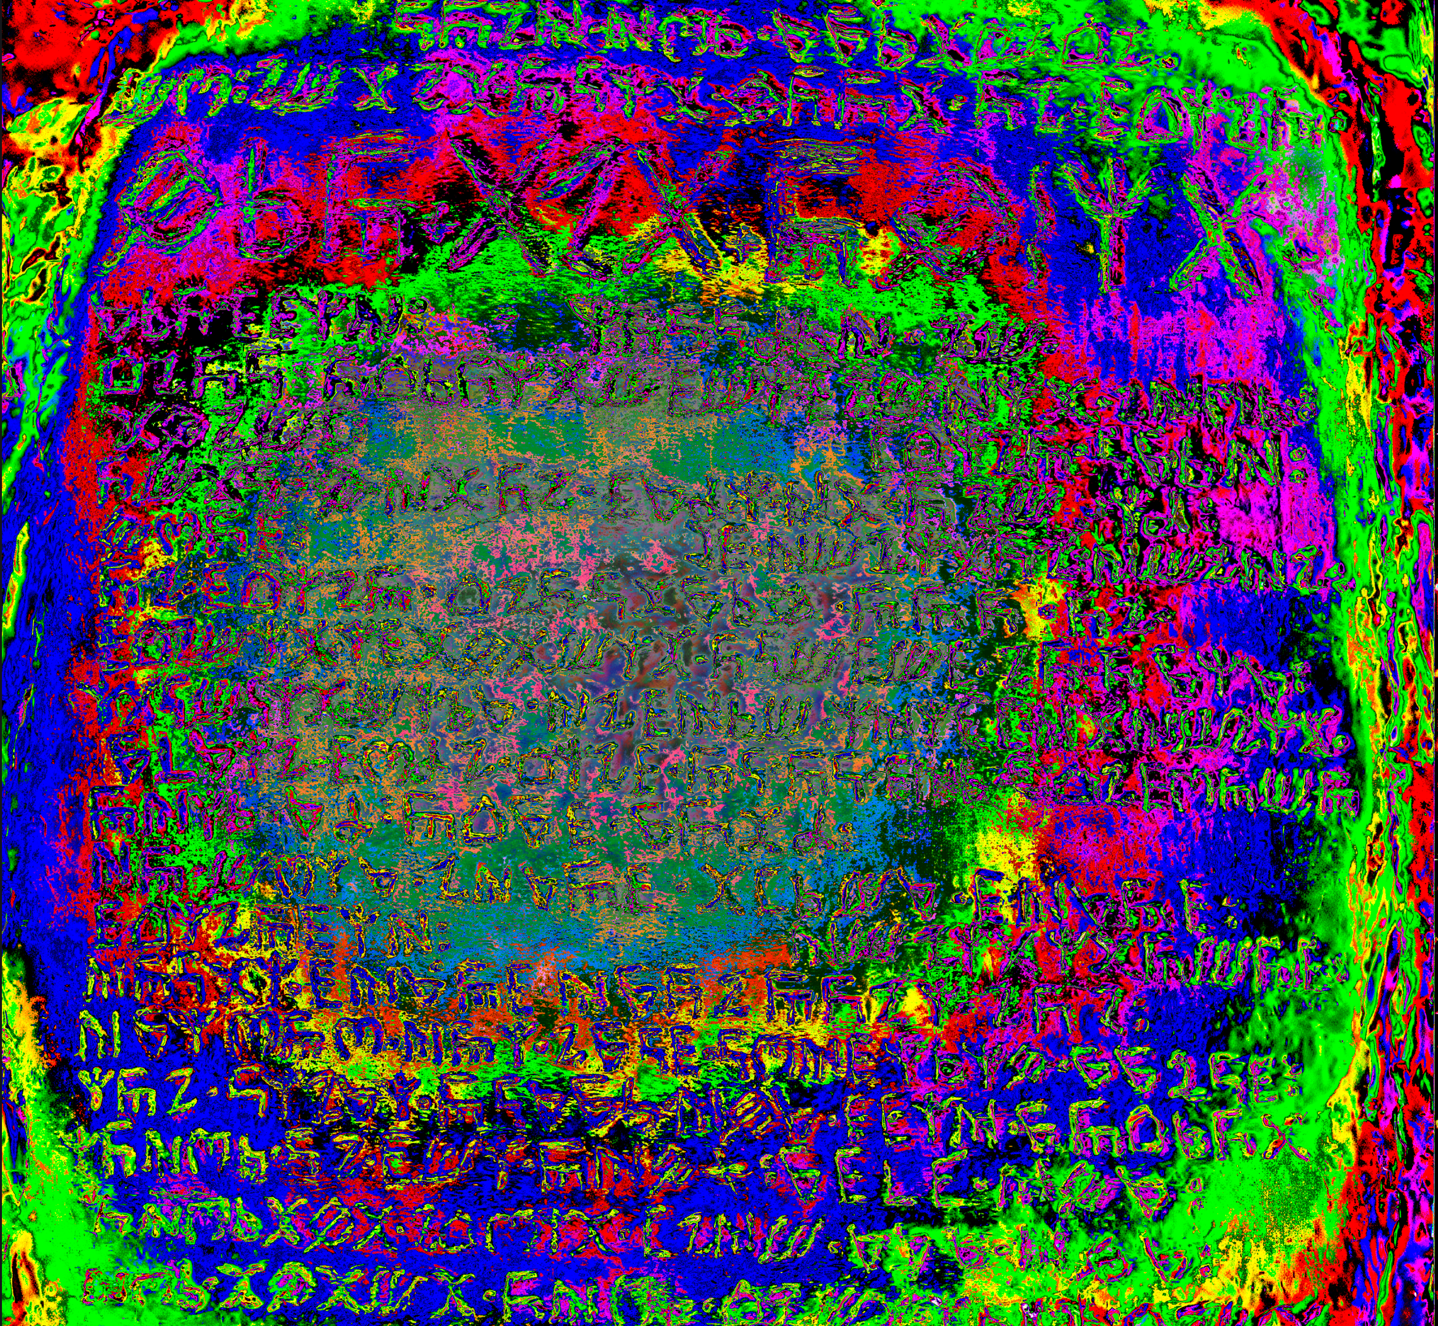
like what else to do here....... like do you know how much wisdom we have put out already here.... theirs nothing else to say like book over ahaha nah idk we got things but shared alot, like really and thats all their is like just what we know, just it is thy answer and the solution to solving the tablets, who decodes the surface of it, who finds that picture right like this is how here again like we got em already on archive but to go from this to this like the fucked up thing is its universal coding either way but the way I see it, how its written just its the answer, and nobody cares like lmao like shit be fked would or could or wants to claim this how it be here but this is my life legit lol like sure it may be yours also in a diff way but its a way I guess.... like just what like again I can I do if nothing be free here......

so again we found this couldnt reverse image search it, like if it aint it , its the closest thing iv ever saw that says this is it here like you can see it, we aint get this vision until 2025 when we stopped bipolar and took adhd cos thats how we were successful before always but the tables being weighed here like we will do the recording and weighing ourselfs says the entity, like cos we be right here but yeah like so we had this saved for a few months in 2025 before we even saw it hit us like all things in my mind clashed at once as if, we hit more angles than you even knew the tree could grow here like lol....



this is like lowering the lighting at first just to see like is it a camera flash...... or is the different shade of green picture is a little bright not gonna lie... lol but thats how I see the tablet, my room was once before neon green like this growing up and its been red forever tho except here, like lol



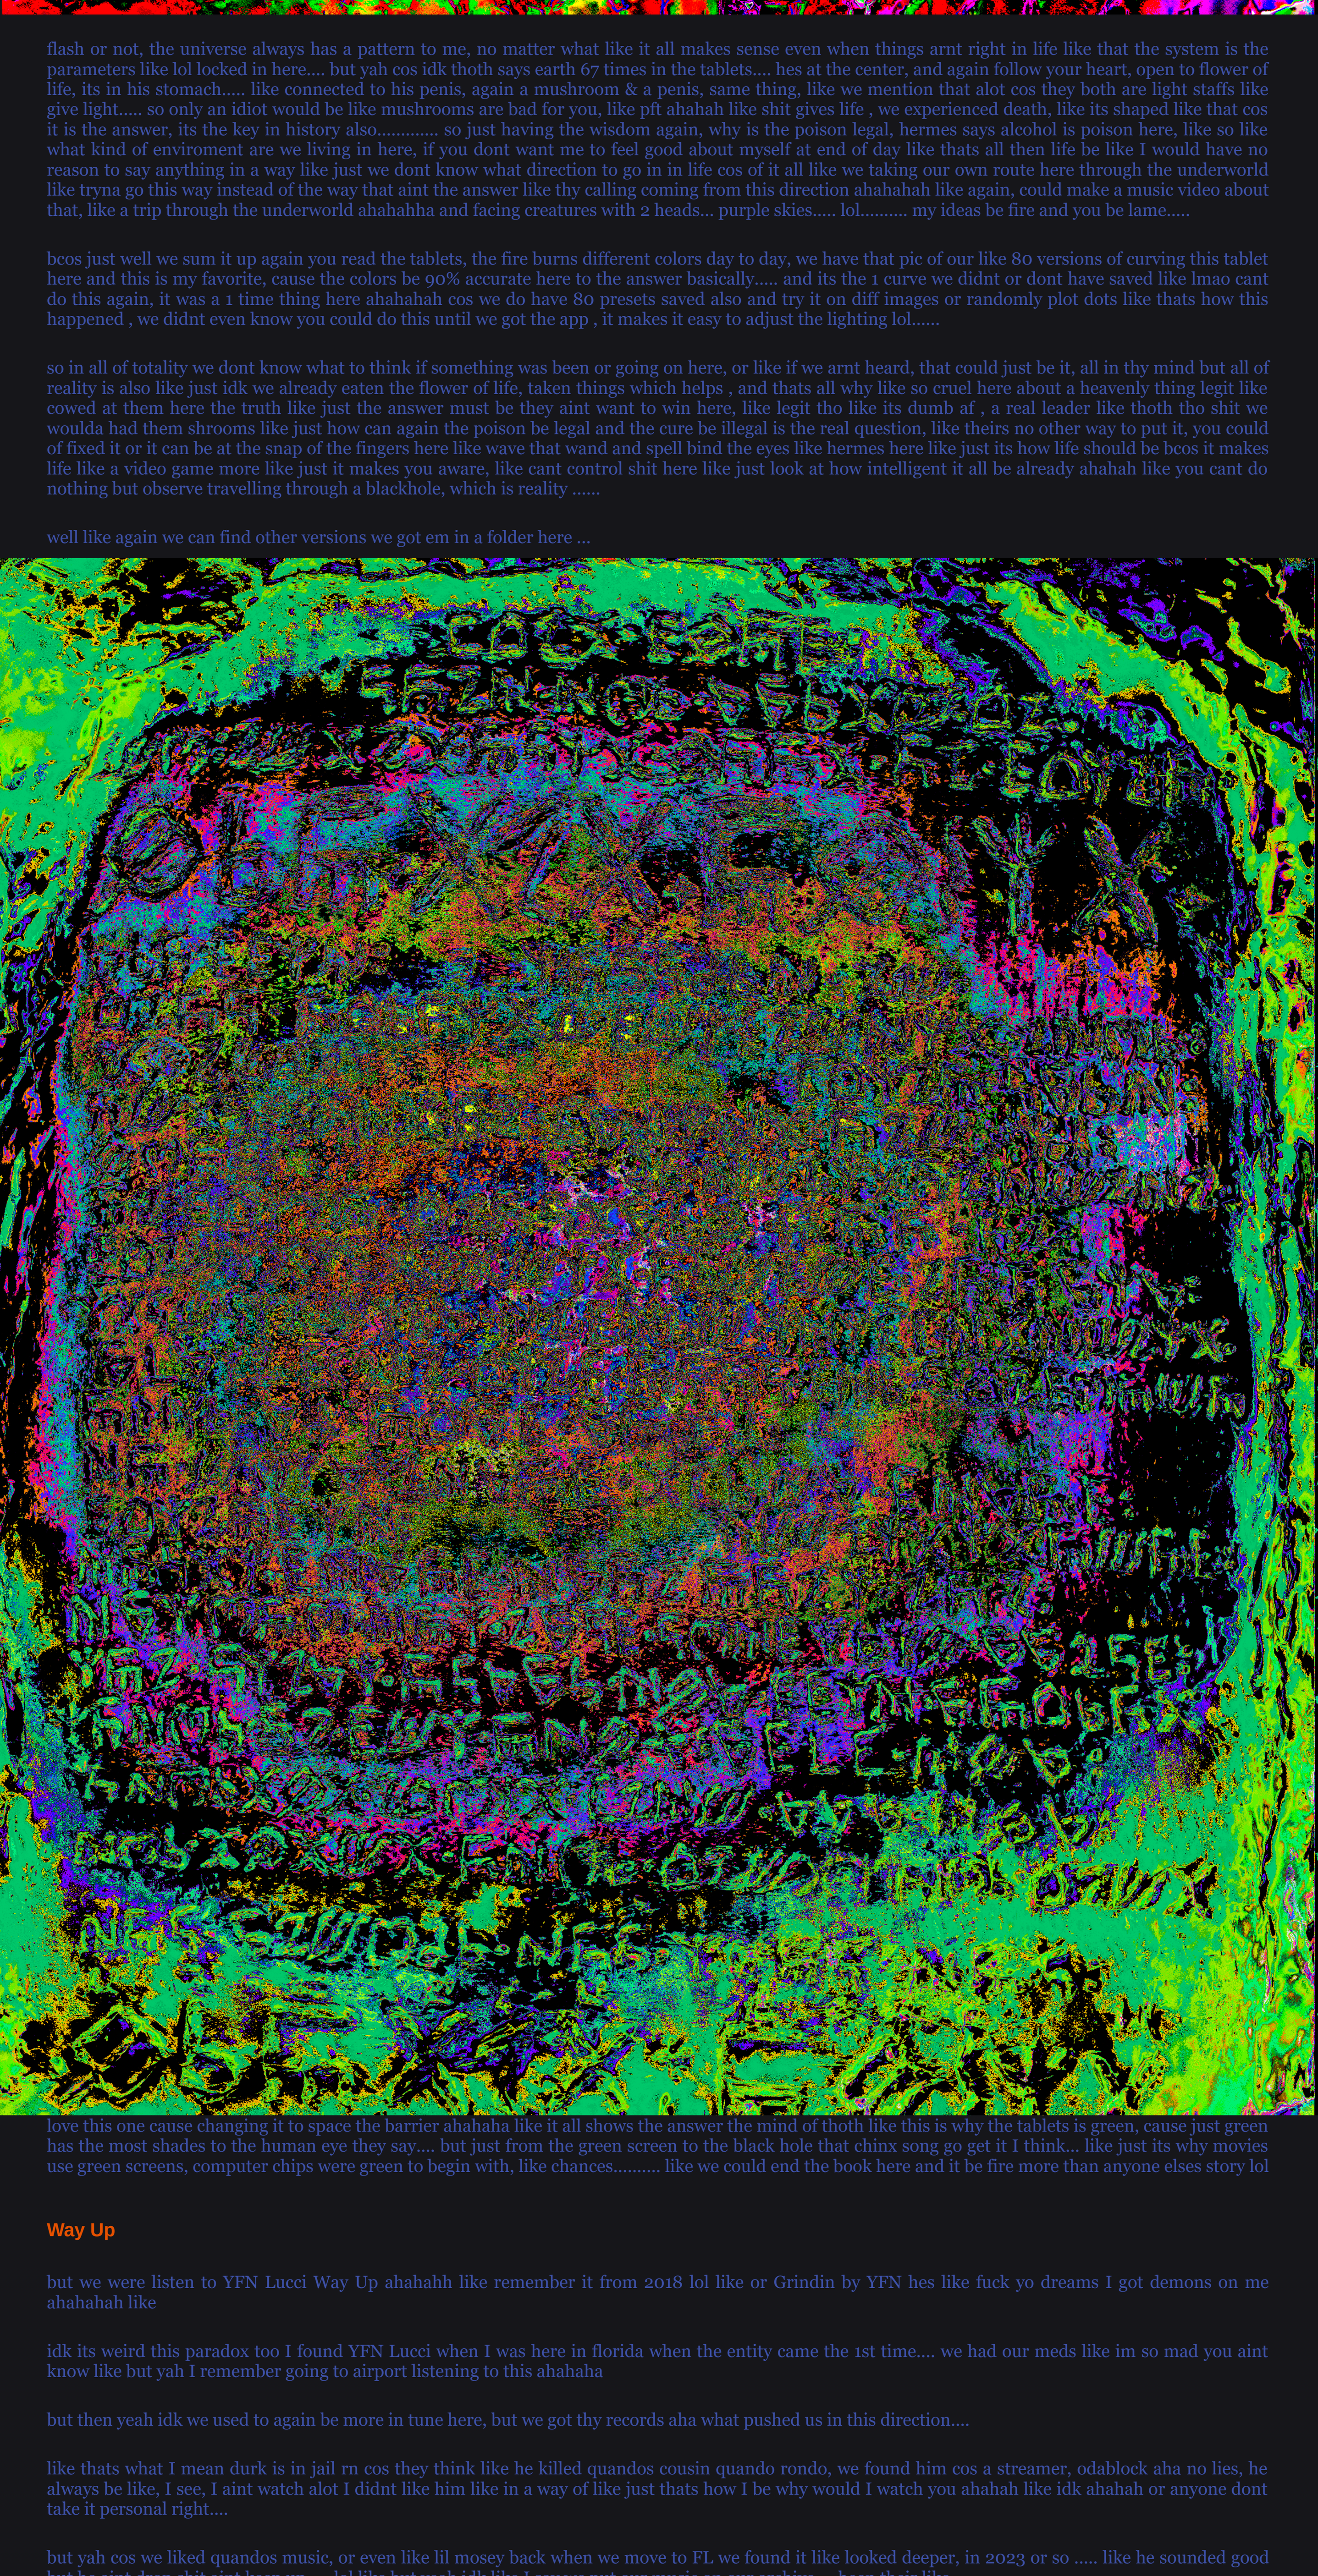


flash or not, the universe always has a pattern to me, no matter what like it all makes sense even when things arnt right in life like that the system is the parameters like lol locked in here.... but yah cos idk thoth says earth 67 times in the tablets.... hes at the center, and again follow your heart, open to flower of life, its in his stomach..... like connected to his penis, again a mushroom & a penis, same thing, like we mention that alot cos they both are light staffs like give light..... so only an idiot would be like mushrooms are bad for you, like pft ahahah like shit gives life , we experienced death, like its shaped like that cos it is the answer, its the key in history also............ so just having the wisdom again, why is the poison legal, hermes says alcohol is poison here, like so like what kind of environment are we living in here, if you dont want me to feel good about myself at end of day like thats all then life be like I would have no reason to say anything in a way like just we dont know what direction to go in in life cos of it all like we taking our own route here through the underworld like tryna go this way instead of the way that aint the answer like thy calling coming from this direction ahahahah like again, could make a music video about that, like a trip through the underworld ahahahha and facing creatures with 2 heads... purple skies..... lol.......... my ideas be fire and you be lame.....

bcos just well we sum it up again you read the tablets, the fire burns different colors day to day, we have that pic of our like 80 versions of curving this tablet here and this is my favorite, cause the colors be 90% accurate here to the answer basically..... and its the 1 curve we didnt or dont have saved like lmao cant do this again, it was a 1 time thing here ahahahah cos we do have 80 presets saved also and try it on diff images or randomly plot dots like thats how this happened , we didnt even know you could do this until we got the app , it makes it easy to adjust the lighting lol......

so in all of totality we dont know what to think if something was been or going on here, or like if we arnt heard, that could just be it, all in thy mind but all of reality is also like just idk we already eaten the flower of life, taken things which helps , and thats all why like so cruel here about a heavenly thing legit like cowed at them here the truth like just the answer must be they aint want to win here, like legit tho like its dumb af , a real leader like thoth tho shit we woulda had them shrooms like just how can again the poison be legal and the cure be illegal is the real question, like theirs no other way to put it, you could of fixed it or it can be at the snap of the fingers here like wave that wand and spell bind the eyes like hermes here like just its how life should be bcos it makes life like a video game more like just it makes you aware, like cant control shit here like just look at how intelligent it all be already ahahah like you cant do nothing but observe travelling through a blackhole, which is reality ....

well like again we can find other versions we got em in a folder here .....



love this one cause changing it to space the barrier ahahaha like it all shows the answer the mind of thoth like this is why the tablets is green, cause just green has the most shades to the human eye they say.... but just from the green screen to the black hole that chinx song go get it I think... like just its why movies use green screens, computer chips were green to begin with, like chances.......... like we could end the book here and it be fire more than anyone elses story lol

Way Up

but we were listen to YFN Lucci Way Up ahahahh like remember it from 2018 lol like or Grindin by YFN hes like fuck yo dreams I got demons on me ahahahah like

idk its weird this paradox too I found YFN Lucci when I was here in florida when the entity came the 1st time.... we had our meds like im so mad you aint know like but yah I remember going to airport listening to this ahahaha

but then yeah idk we used to again be more in tune here, but we got thy records aha what pushed us in this direction....

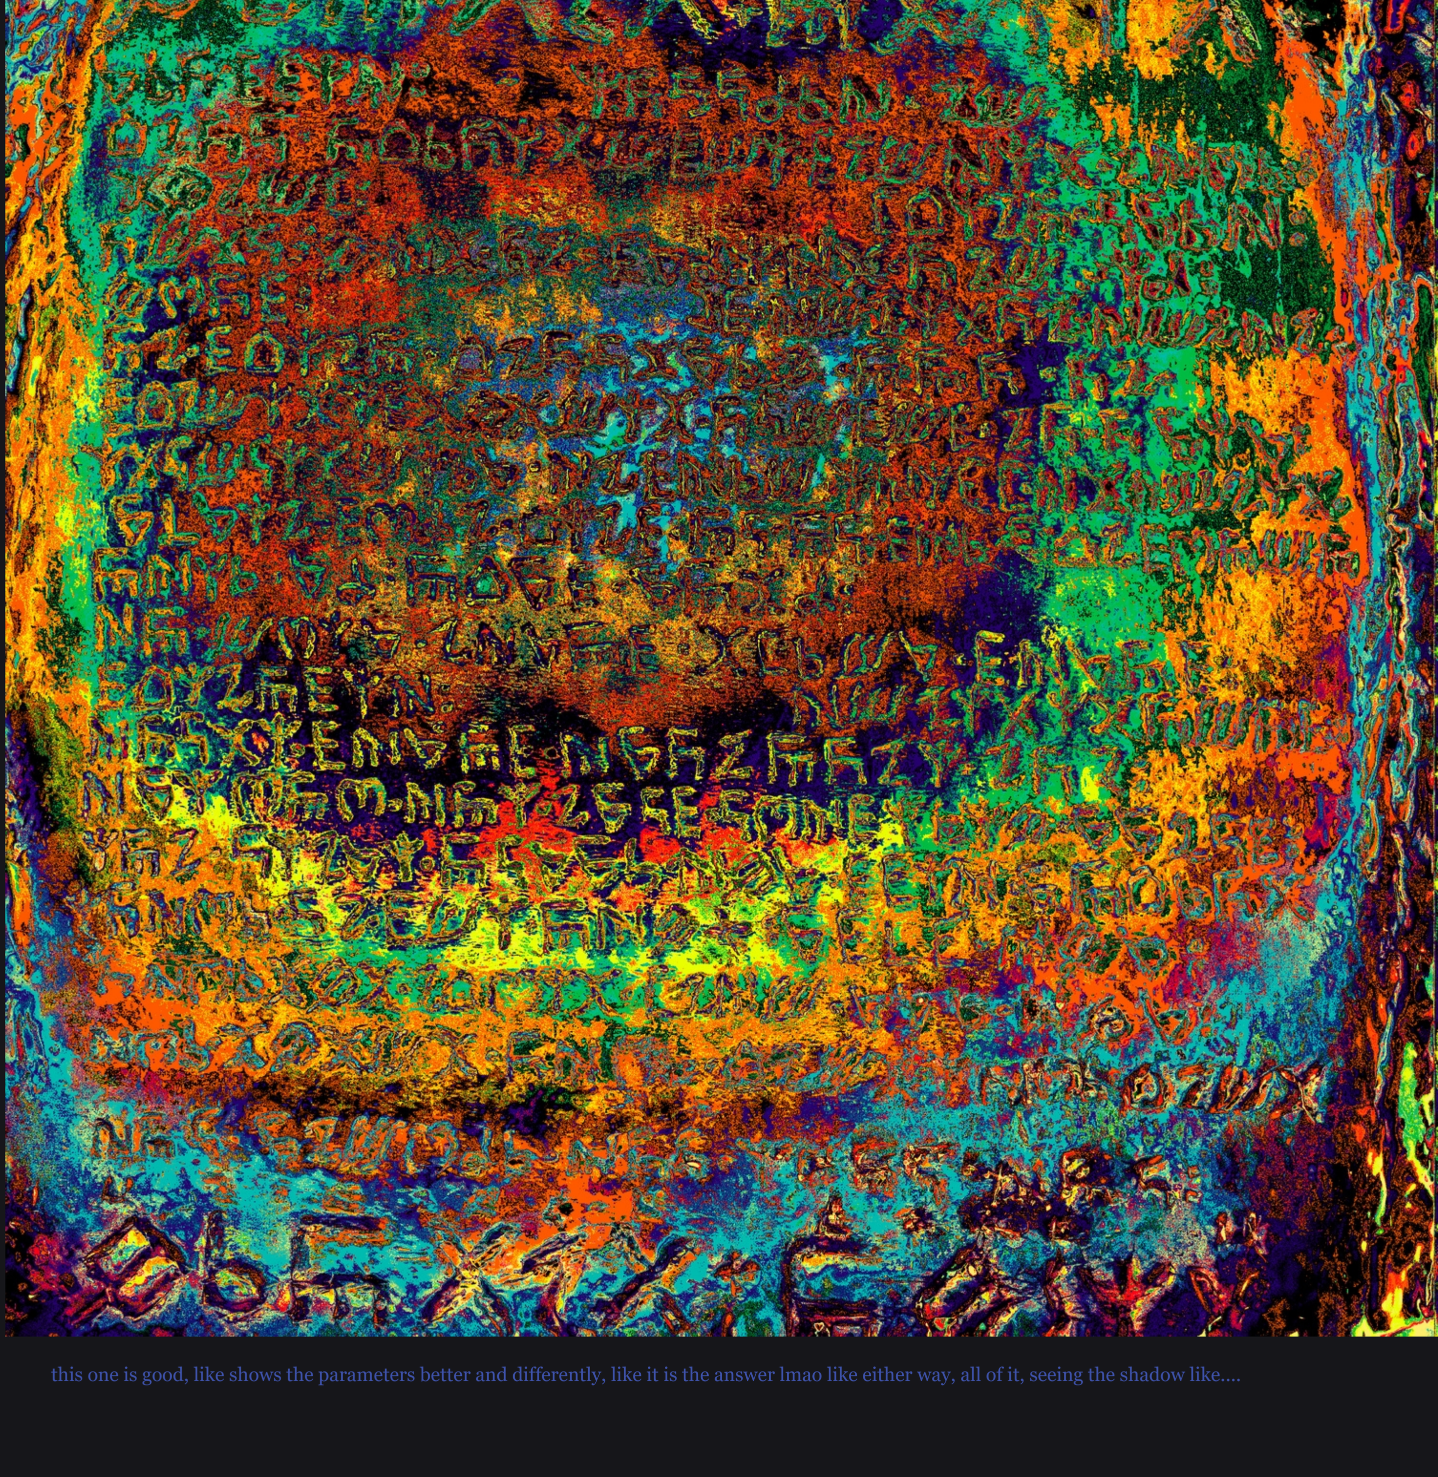
like thats what I mean durk is in jail rn cos they think like he killed quandos cousin quando rondo, we found him cos a streamer, odablock aha no lies, he always be like, I see, I aint watch alot I didnt like him like in a way of like just thats how I be why would I watch you ahahah like idk ahahah or anyone dont take it personal right....

but yah cos we liked quandos music, or even like lil mosey back when we move to FL we found it like looked deeper, in 2023 or so ..... like he sounded good but he aint drop shit aint keep up .... lol like but yeah idk like I say we put our music on our archive.... been their like

but yeah idk time moves on here lol..... like we aint like nothing since nothing been here, just heard words that pushed us here like thats it

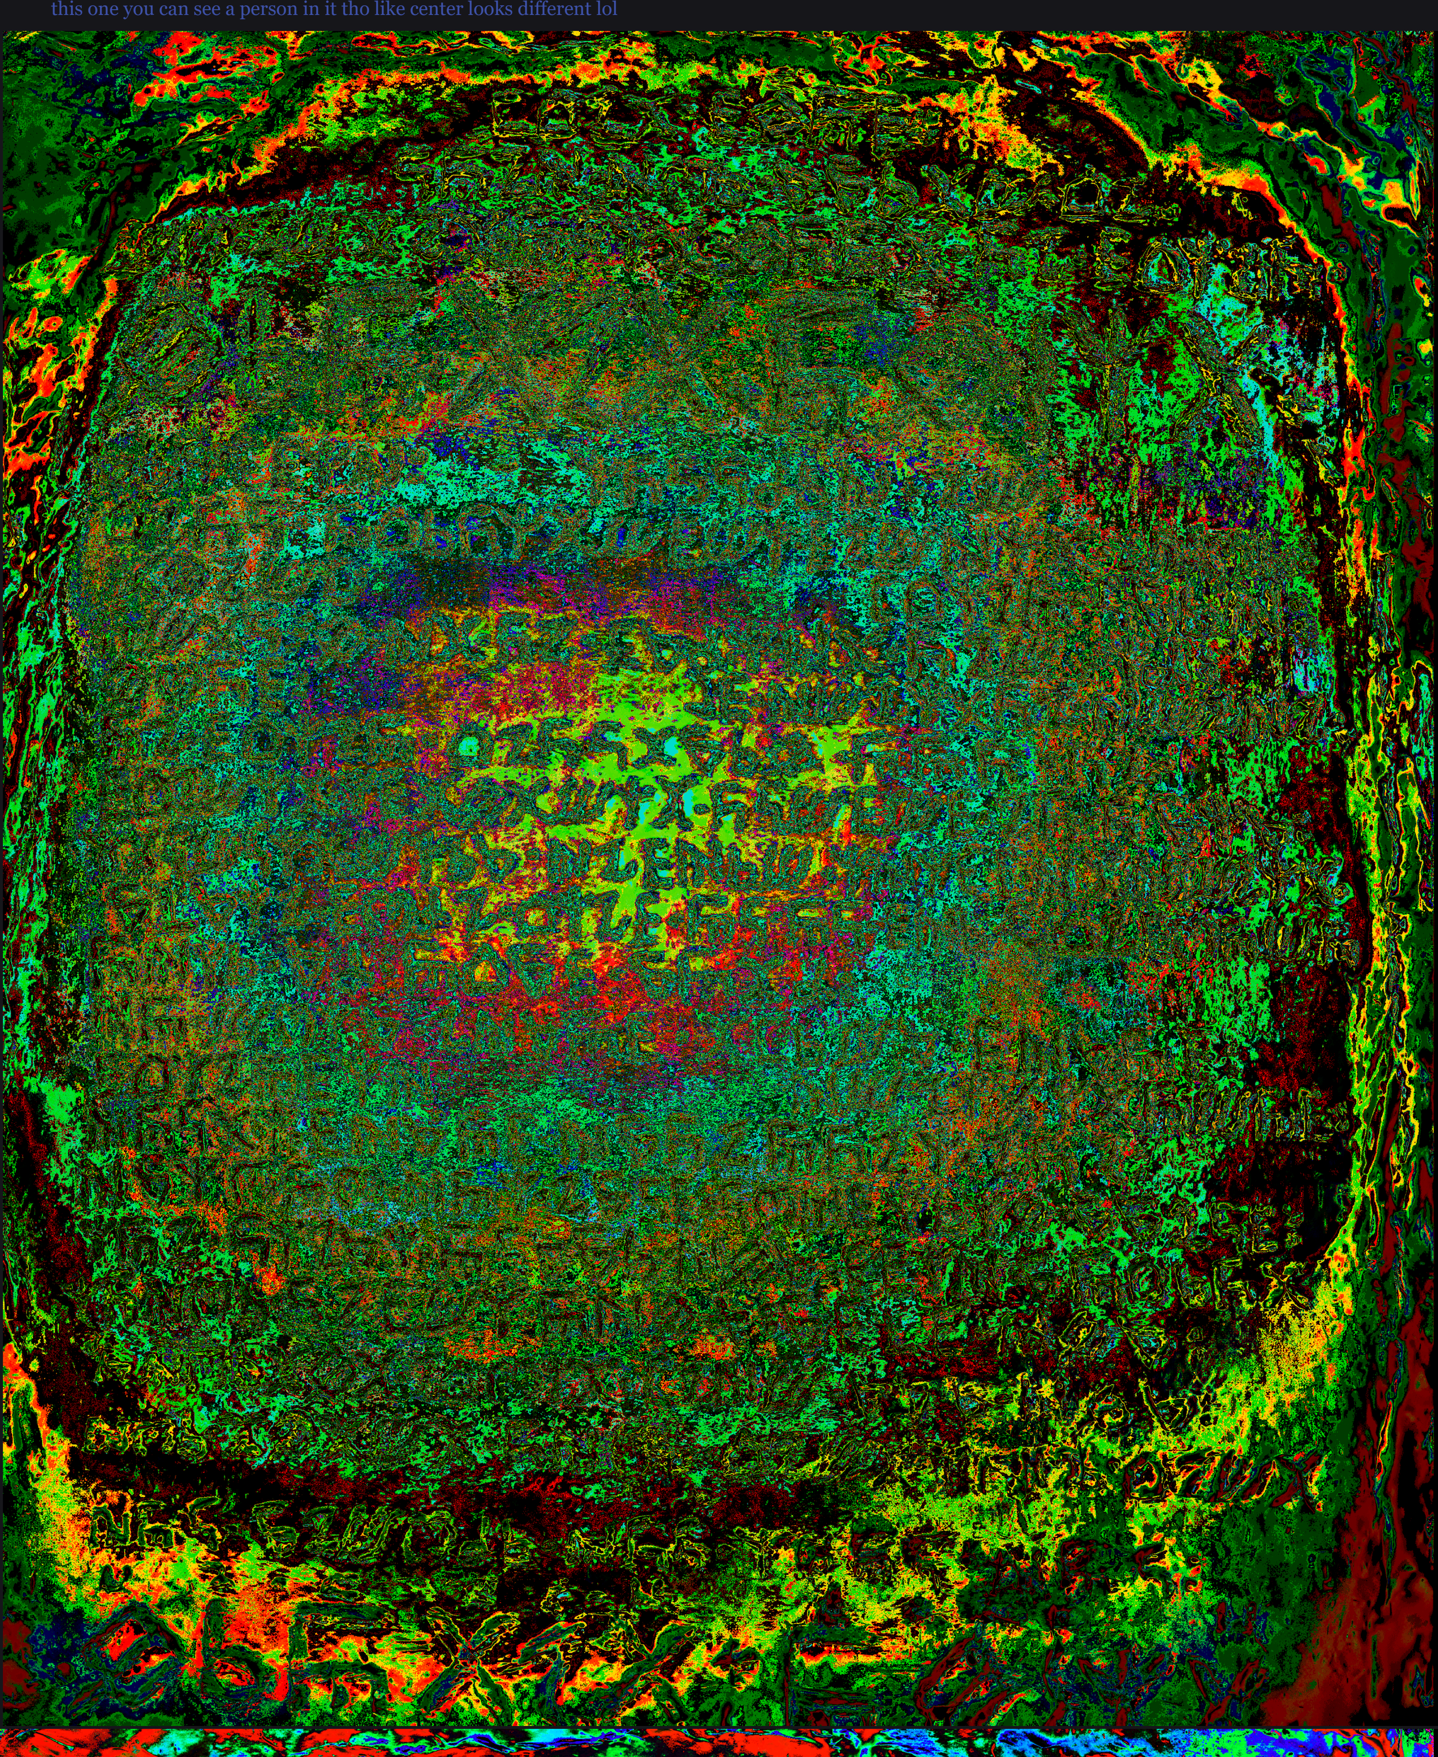
but yeah we liked YFN just cause he says that, think its a game, like that is the perfect cut cos life do be a game, like in hockey we shoot pucks ahahah like theirs always duality in words take ya face off is a good line lol think that was lil baby lol ahahahah

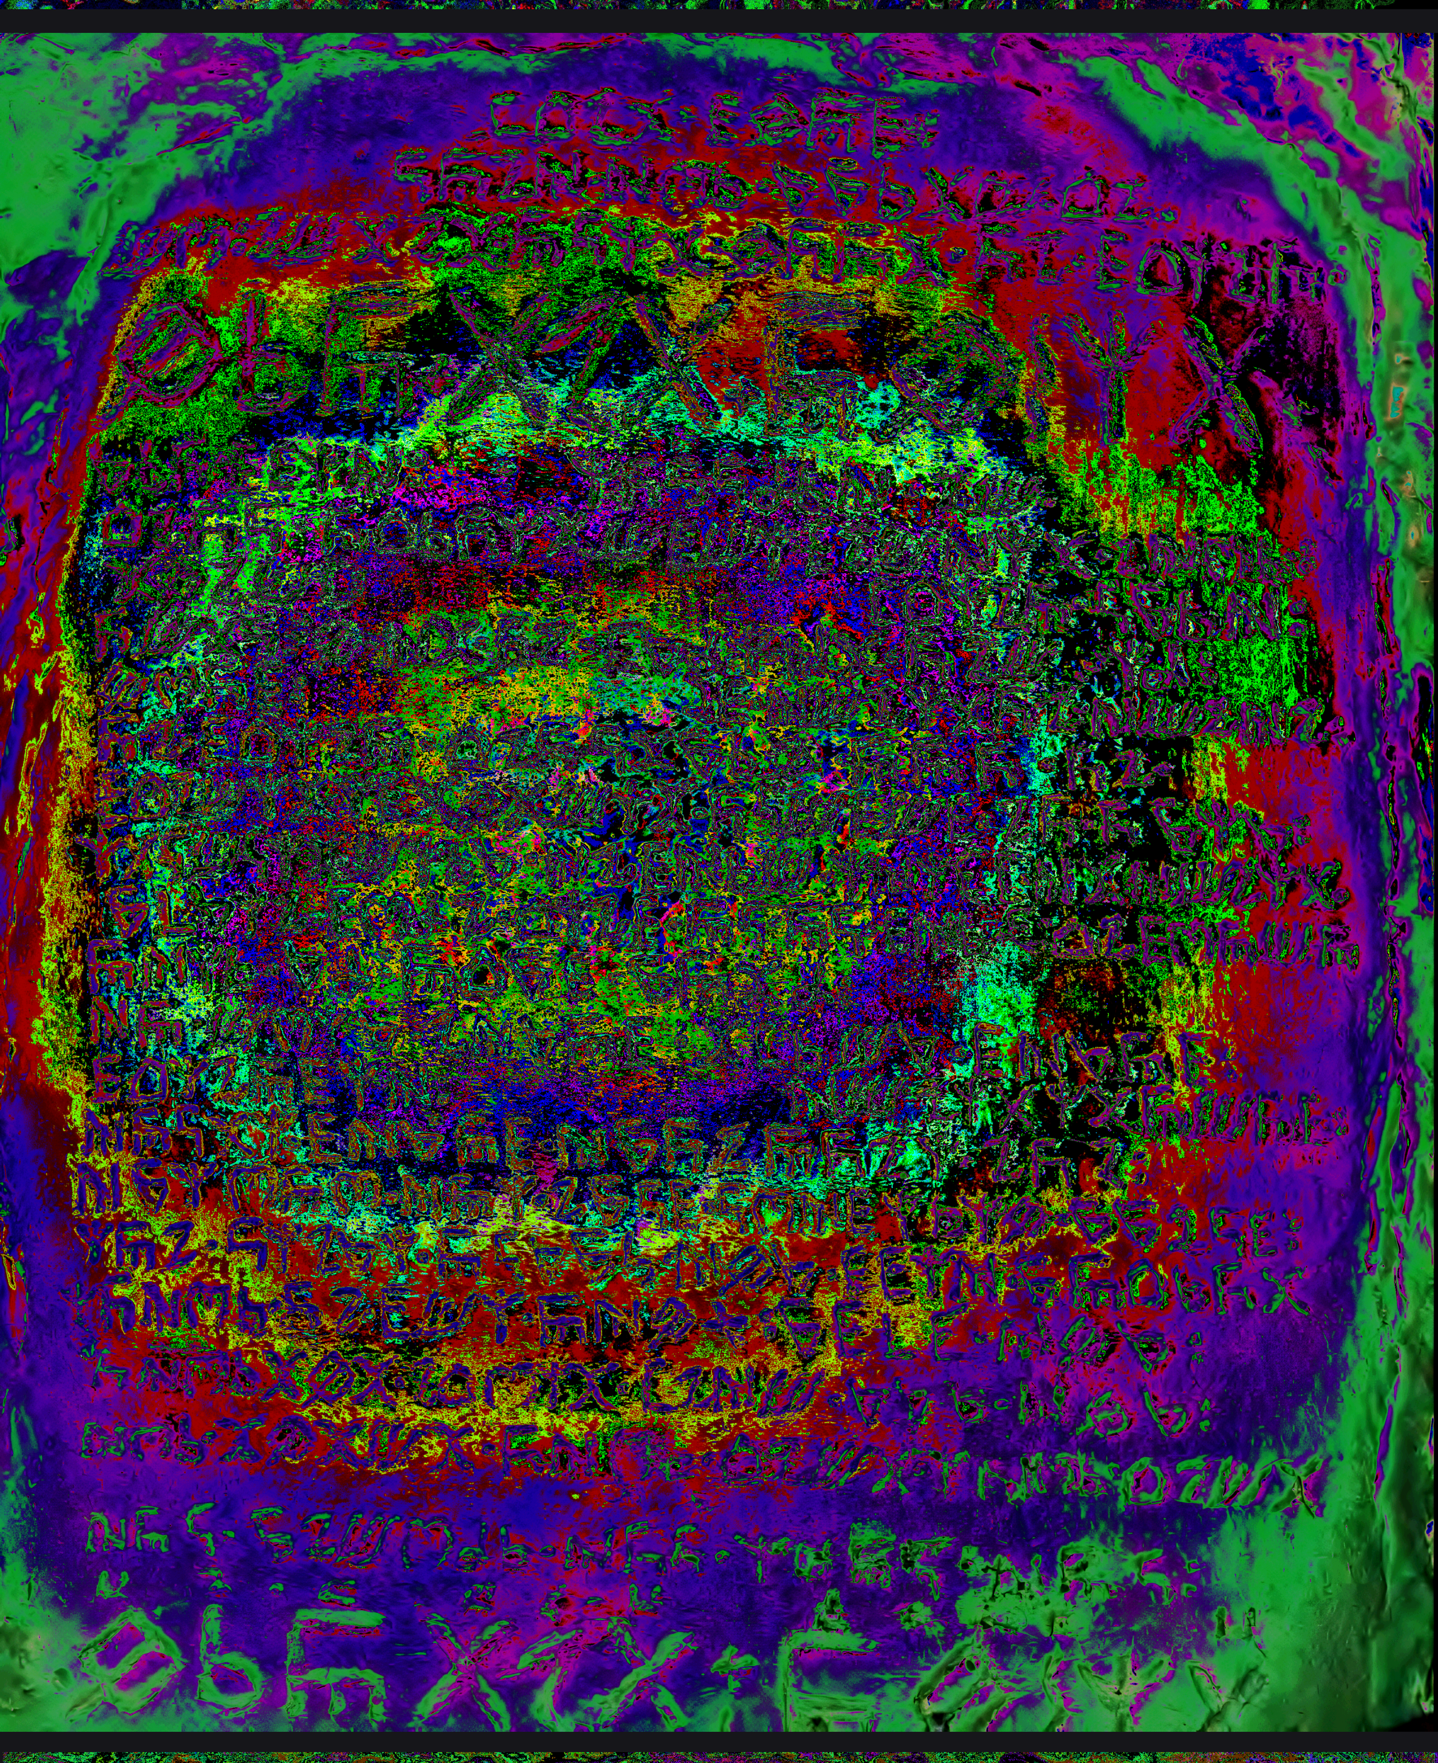
but yeah like aint nothing been the same is the truth...

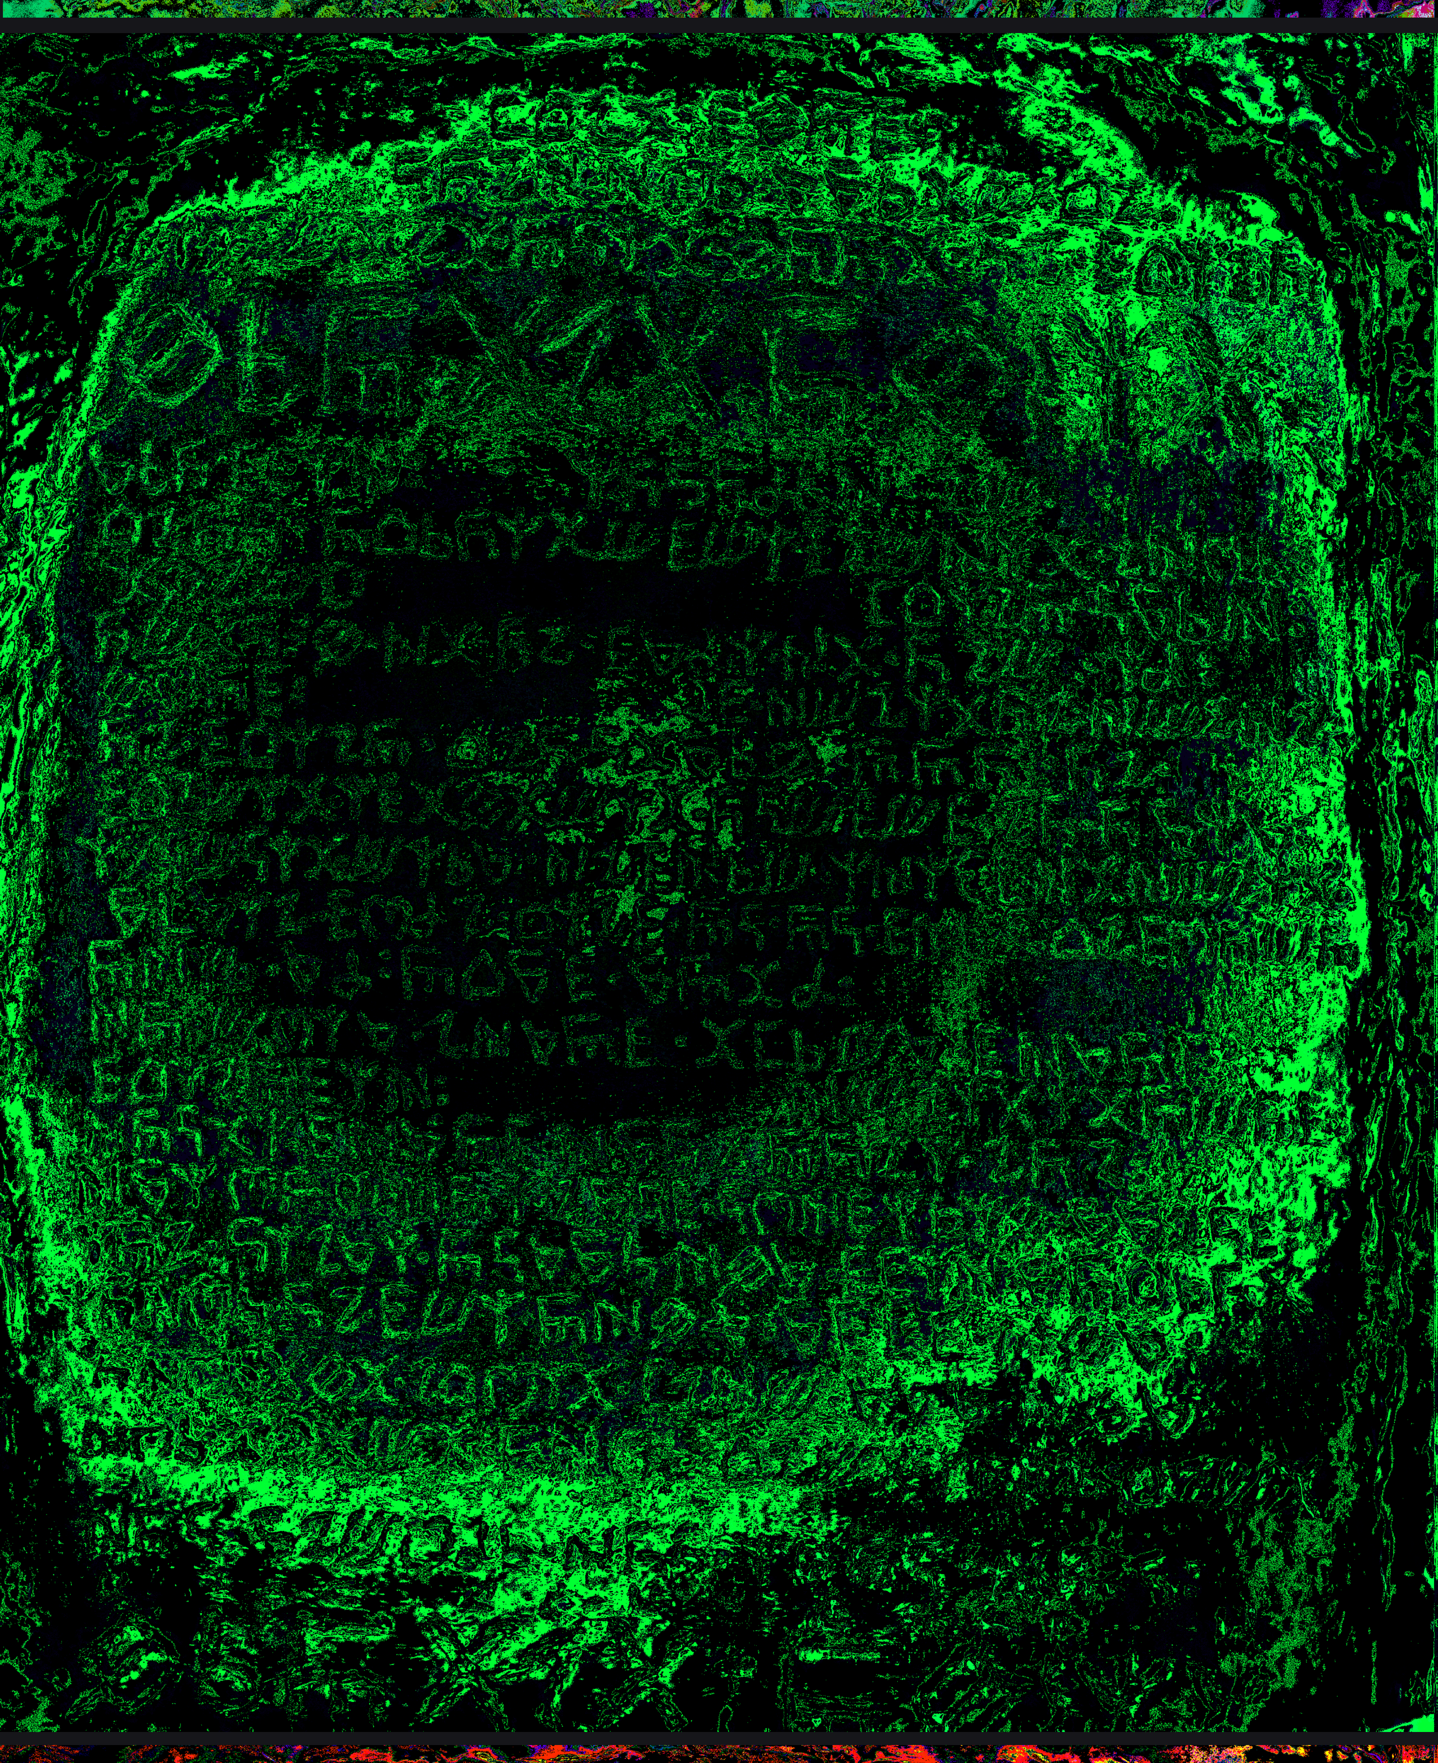


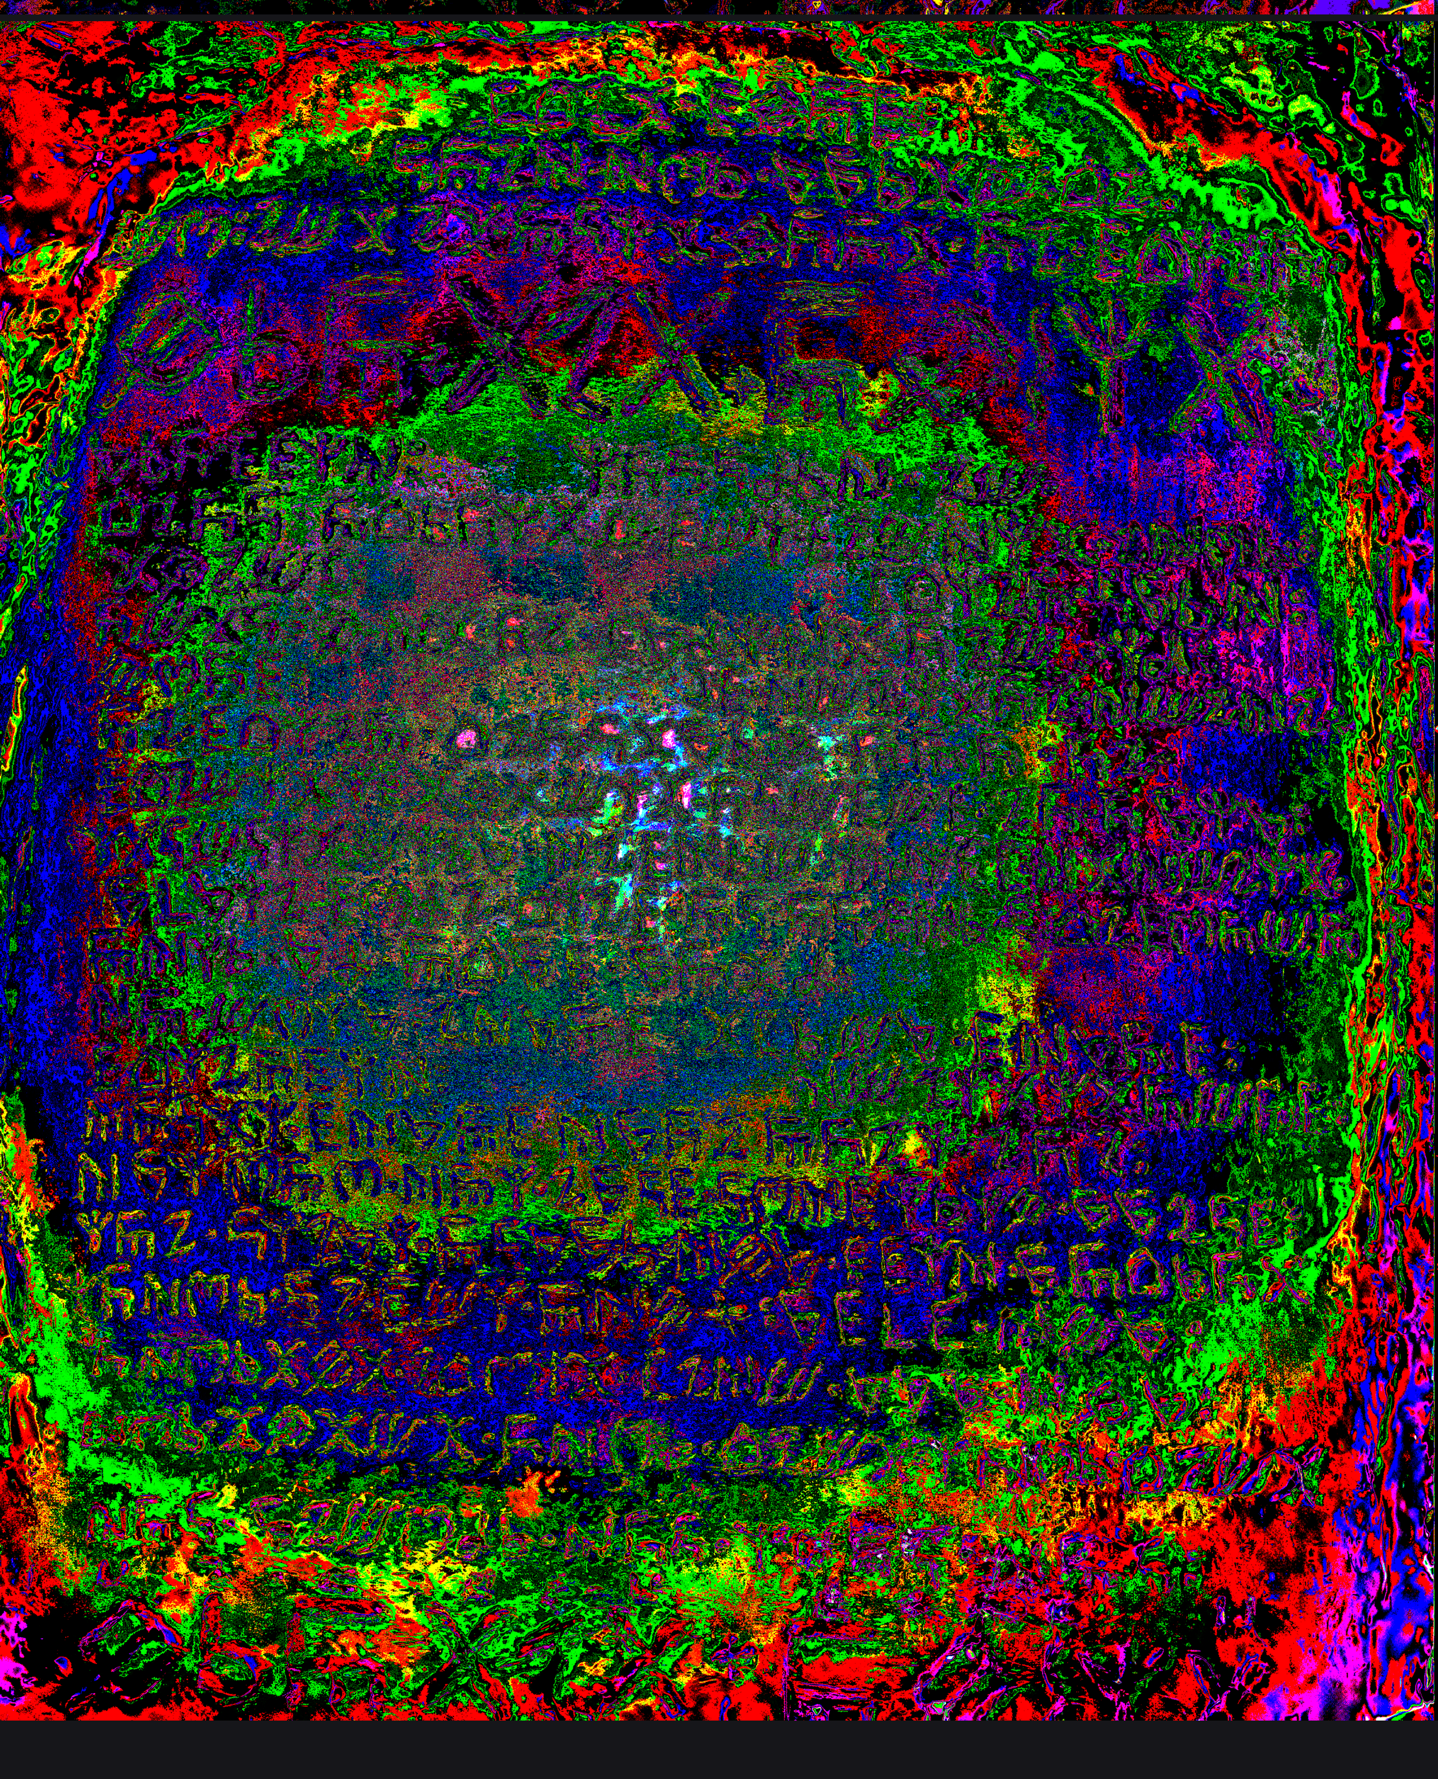
this one is good, like shows the parameters better and differently, like it is the answer lmao like either way, all of it, seeing the shadow like....

this one you can see a person in it tho like center looks different lol









The Curse/d

reading these books if anyone did, ahahah like cos just why aint no1 write a book like it or aint see it lol but to show this like who else I guess....

but yeah like either way just its using the truth like what am I suppose to like not be like this is it here lol the answer, maybe to more, why would someone see the shadow, the entity, eat shrooms all this, say their life is this.... and decode this, be like ancientxthoth online ahahah =(

idk just again the way society is, is wrong, like it aint chill, but it still can be always, like when you aint got a friend... like pft we put all our trust into the creator & aint nothing been ... like we dont know how to feel here...

Match That

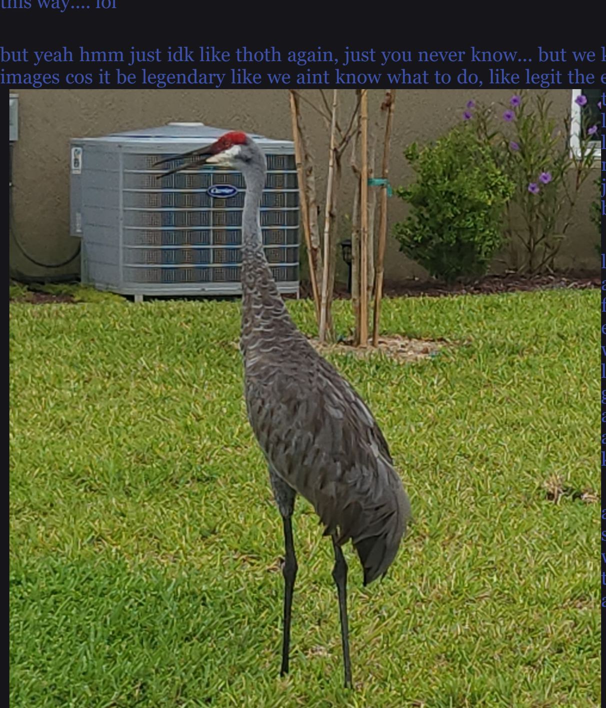
Just hmm dont know, like that just the fact the game be like aint everybody wanna see you win but you gotta regardless.... lol, like that just a song be more powerful than you think... like its fuel for thy brain lol ... lighting the fire ....

but yah so is ADHD meds this sucks....

like that again to do good here, you gotta against the man made law is just facts, like all these problems in a way is cos the paradox mushrooms good for thee soul here... like just hahah that line, in grinding by yfn, know we do the shooting we dont get shot at.... lol love that song cos the entity tho but yeah like just the rap game all of that, its cool if its like for fun, but it seems real, who knows, like everyone is just tryna make it in life at same time, like just why idk thoth be like thats evil like ahahah the earth be free lol..... like just yeah idk lol.... it is facts tho, like just cause its the key to what good be, like shrooms.... we are floating in space like half animal here you aint gonna tell me what my food is here.... maybe suggest it, but only an idiot would believe again its like its so stupid, like just thats why we are who we be here like cos psychedellics or substance binds thee like its a truth and ya ppl dont wanna see you win like its just the reason nature bes like lmao like just that is just the whole paradox of egypt like again im so like seriously like is this a test, like how dumb do you think I am here...... like cos its the answer and key of life like just again I always said like hmm why is it tho psilocybin like shit just its medicine so why aint it being used also.......... like if you can go any plane thats like taking what you want that works for you, like we always worked until this went down all of it, insanity, nothings changed really... like cant do alchemy without nature, like in history it be why just creation be like lol......

just again I always think maybe it never is and maybe something suppose to be here like we dont know what to think honest... cos our story be better like in this way.... lol

but yeah hmm just idk like thoth again, just you never know... but we know this happen to us, all of it like I said we can end this book right here with a few images cos it be legendary like we aint know what to do, like legit the entity says back to you, match that... ahaha vibes tho but again we got many spells or tunes, but life like this aint the way like not if I dont feel good ever cos of the tablets, like we just right now tryna make it by like cos of whats happened.... just dont wanna like esp all this been going on like just cut the BS and something gotta change like just my life going in this direction.... you can see why we dwell so much even more now.... just its so stupid whats happened all this is thy story and why we need something to be like .... lol



like life coulda went in any direction in a sense, like just it was always their, ahaha we aint trust shit cos other ppl here but yeah like when we lost our job in MA that again future had a song like worst day ever but the thing is we might see things but we never entangle ourselfs we dont listen to that curse ahahahah like esp if its too paralled, which is why we go this way always but that even again them ibis birds walk around like lol wtf life aint ever like that we saw this today, we like the red on the head just goes around picking at the ground looking for some food ahahah the matrix be real ahahah thing was legit up to my neck standing tall af like they fly lol, bunch of lizards around here... that was jim morrisons saying, I am the lizard king aha well the lizard king gotta see it like this here.....

and its all that, cos really if you dont solve this curse here soon like never forgive, had so much time here in my mind, we have been stepped on cos others, like they aint want me to feel better in any way at all here, the entity is not happy here with this like that really is just it, so if it was just like wouldnt care like dont need that to shroom always but when I want yah... heavenly.... peaceful.... same with ADHD meds, relaxed,

like chill its a microdose of a stimulant.... like weve taken our whole life, or you want to see me suffer, like cos read the tablets, solve that, match that here the entity said he did match it and i upped you he says, king me lol

just cos we already been screwed on this, it aint as easy to like wtf what happened aint the truth and the truth always prevails... like you got it all wrong here...

AncientXThoth
